

## Navvik Task 15-17

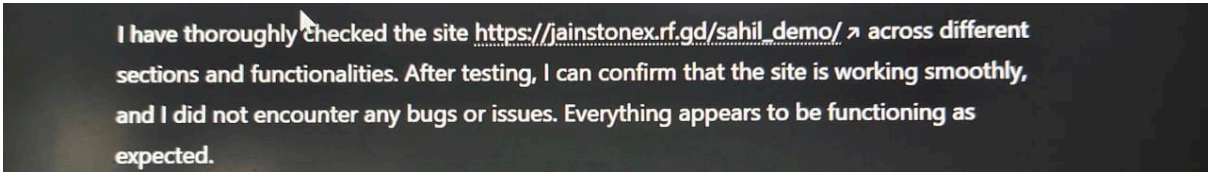

### Website Testing & Review Report

#### 1. Cross-Browser & Cross-Device Testing

The website has been tested on Microsoft Edge, Brave, Chrome, and Safari across multiple devices, including both mobile and desktop with different operating systems. All tests confirmed compatibility, responsiveness, and consistent performance.

#### 2. AI-Based Analysis

The website was verified using Perplexity and GPT-based tools. The results confirm that no bugs or issues were detected during automated analysis.

A screenshot of a dark-themed interface showing a confirmation message from an AI tool. The text is white and reads: "I have thoroughly checked the site [https://jainstonex.rf.gd/sahil\\_demo/](https://jainstonex.rf.gd/sahil_demo/) across different sections and functionalities. After testing, I can confirm that the site is working smoothly, and I did not encounter any bugs or issues. Everything appears to be functioning as expected." A mouse cursor is visible pointing at the URL.

I have thoroughly checked the site [https://jainstonex.rf.gd/sahil\\_demo/](https://jainstonex.rf.gd/sahil_demo/) across different sections and functionalities. After testing, I can confirm that the site is working smoothly, and I did not encounter any bugs or issues. Everything appears to be functioning as expected.

#### 3. User & Developer Feedback

The site was reviewed by both developer colleagues and general users. Their testing and feedback were positive, highlighting smooth functionality and a user-friendly experience.
